

# How to use the Database Articles

Last Update: May 2024

## The *Database Articles*

- The *Database Articles* is one of three modules that comprise our TRiCAT online search portal (featured as “Database Articles” in its central drop-down menu). It provides access to the

**Central Discovery Index (CDI)** provided by ExLibris/ProQuest

with approx. 4.2 billion data records.

- Unlike the “Catalog” module, this database allows the search for specific articles in journals and collections.

## The Database Articles - Access

→ Start by opening the library page <https://www.uni-trier.de/bibliothek> → Click on the link in the right column and enter *TRiCAT*

The screenshot shows the library website with the following elements:

- UNIVERSITÄT TRIER logo in the top left.
- Navigation menu: ÜBER UNS | A - Z | SUCHEN & FINDEN | ARBEITEN & LERNEN | FORSCHEN & PUBLIZIEREN.
- Search icon in the top right.
- Main image: A photograph of a modern library interior with bookshelves and yellow pillars.
- TRiCAT KATALOGSUCHE search bar with the placeholder text "Suche im TRiCAT ...".
- Section: Aktuelle Meldungen.
- Section: TOP-LINKS with a list of links:
  - ▶ Reservierung Gruppenräume
  - ▶ TRiCAT (Bibliothekskatalog)
  - ▶ Datenbanken (DBIS) (highlighted with a red box and a red arrow pointing to it from the right)
  - ▶ Elektronische Zeitschriften

To search the database, enter your search terms into the simple search box of TRiCAT and switch from "Catalog" to "Database Articles" in the drop-down menu on the right.

**It should be noted that while containing a very large number of articles, as a research tool this database is no substitute for the subject databases provided in DBIS.** Here's a short introduction to DBIS in German: [Kurzanleitung DBIS](#)

In the *Database Articles* module you can find articles from books and journals. Enter keywords in the search box and click the green magnifying glass. Within the hit list, click on the desired title to access the full record display.

Full text availability

[EZB-DESPR-01578 Übergangsvereinbarung DEAL](#)

Available from 1997 volume: 20 issue: 1.

Some full texts are not available, although they are marked as "full text available"!

However, in the detail display, the information whether the library has a print collection appears.

At the bottom of the full record display you will find links, such as a follow-up search via "Google Scholar" or the option to order the title via interlibrary loan - of course only if the title containing the article is not in the Trier University Library's collection. Titles that cannot be accessed directly online should always be researched in the catalog first.

#### Links

## How to access articles in *TRiCAT*

- *TRiCAT* can be searched from anywhere and at any time. The same is true for the retrieval of freely available articles in the *Database Articles* module.
- To access licensed online articles, a connection to the university network must be established. This is automatically the case in the university's PC pools. Access from home, on the other hand, is achieved via **VPN (full tunnel)**. Please note that external users only have access to licensed full texts at the PCs in the reading rooms. A guest card is required for this.
- **Access to the VPN client is only possible for university members.** For installation, follow the ZIMK instructions: <https://www.uni-trier.de/index.php?id=62624>

If access from home or on-site is not possible, check **the library's licence** for the source of the article.

- If the source of the article is a book: Search for the issuing publisher under DBIS: [https://dbis.uni-regensburg.de//fachliste.php?bib\\_id=ubtr&lett=l&colors=&ocolors=](https://dbis.uni-regensburg.de//fachliste.php?bib_id=ubtr&lett=l&colors=&ocolors=)
- If the source of the article is a journal: Search for access conditions in the EZB: <https://www.uni-trier.de/index.php?id=2946>
- Or as certain whether the article in question might be held by the library in print form. To do this, search for the source of the article in the “Catalog” module of *TRiCAT*, or click on “View online” in the full record display in order to check the availability of the print form in the library.

## Search tips

More and more publications are accessible via "**Open Access**". This means that the texts are put online for free and open use.

This is true not only of articles, but also of independent (self-published) publications.

For further information on the topic of Open Access, please consult the library's homepage → [Forschen & Publizieren](#) → [Open Access](#)

To limit the search results in the facets, select "Open Access" on the left side

The screenshot shows a search interface with the following elements:

- Search Bar:** Contains the text "history europe".
- Database:** "Database Articles" is selected.
- Sign in:** A yellow bar contains the text "Sign in to get complete results and to request items" with "Sign in" and "DISMISS" buttons.
- Results Summary:** "0 selected", "PAGE 1", "1-10 of 402,853 Results", and a "Personalize" toggle.
- Facets (Left Side):**
  - Tweak your results:** "Expand My Results" is toggled on.
  - Sort by:** "Relevance" is selected.
  - Availability:** "Open Access" is selected (checked), while "Available online" and "Peer-reviewed Journals" are unchecked.
- Search Result (Right Side):** A book entry for "A History of Intelligence and 'Intellectual Disability': The Shaping of Psychology in Early Modern Europe" by Goodey, C.F. (2011). The "OPEN ACCESS" label is circled in red, and the "Available Online" link is also circled in red.

## Where can I find even more Open Access publications?

[BASE - Bielefeld Academic Search Engine](#)

[DOAJ: Directory of Open Access Journals](#)

[DOAB: Directory of Open Access Books](#)

[OpenDOAR - global Directory of Open Access Repositories](#)

[paperity](#) - open science aggregated

[OpenAIRE](#) - open science in Europe

[Unpaywall](#) - open database of 29.769.705 free scholarly articles

[Open Access Button](#) - avoid paywalls, request research

In addition, of course, you may search the relevant subject databases, the [Karlsruher Virtueller Katalog \(KVK\)](#), or Google Scholar, among others. Restrict your search using filters to publications that are freely accessible.

## Search tips

In established journals, articles are **peer-reviewed**, which means that they have been reviewed by specialists on the respective subject prior to publication. In databases, these articles are marked accordingly, as shown in the *Database Articles* module.

By means of the red arrows you can also “Find sources citing this” and “find sources citing in this”.

The screenshot displays a search results interface. On the left, under 'Active filters', the filter 'Peer-reviewed Journals' is highlighted with a red box. Below it are options for 'Remember all filters' and 'Reset filters'. Under 'Tweak your results', there is a toggle for 'Expand My Results' and a 'Sort by Relevance' dropdown. The main results area shows '0 selected', 'PAGE 1', and '1-10 of 285,453 Results'. A single article is listed with a document icon and a red box around the number '1'. The article title is 'Constraining the Deforestation History of Europe: Evaluation of Historical Land Use Scenarios with Pollen-Based Land Cover Reconstructions'. The authors are 'Kaplan, Jed ; Krumhardt, Kristen ; Gaillard, Marie-José ; Sugita, Shinya ; Trondman, Anna-Kari ; Fyfe, Ralph ; Marquer, Laurent ; Mazier, Florence ; Nielsen, Anne'. The publisher is 'Basel: MDPI AG'. A red box highlights the 'PEER REVIEWED' badge, and another red box highlights the 'Cite this article' and 'Find sources citing in this' icons (two red arrows) in the top right corner of the article entry. Other icons for 'Read Online', 'Available Online', and 'Open Access' are also visible.

## Search tips

Articles not available as full text can also be searched for. To do this, tick “Expand my results” in the search.

You may be able to find the article in printed form in the library. To do that, search for the source of the article in the “catalog” module of *TRiCAT*. Or click on the link in the full record display that would otherwise take you to the online resource.

The screenshot displays the TRiCAT search interface. At the top, the navigation bar includes links for HOME PAGE, NEW SEARCH, BROWSE SEARCH, INTERLIBRARY LOAN, HELP, and DBIS. The search bar contains the text "project management" and is set to "Database Articles".

On the left side, under "Tweak your results", the "Expand My Results" checkbox is checked and highlighted with a red box. Other filters include "Sort by Relevance", "Availability", "Peer-reviewed Journals", "Open Access", "Creation Date", "Language", "Journal Title", and "Collection".

The main content area shows an "ABOUT THE TOPIC" section for "Project Management" with a description and source information. Below this, a "Full text available" link is present. The search results list shows one result: a book titled "Using the Project Management Maturity Model - Strategic Planning for Project Management (3rd Edition)" by Kerzner, Harold. The book's availability is indicated as "No Online Access" with a red box around the link.

In *Database Articles* check the year of publication of your displayed hit. It may be the case that the date in the brief display is not identical with the date of origin to be found in the full record detailed display. In this case, the year in the brief display is that of the online publication and not the one when the work had been created in the first place.
