Join HuMap Trier and CartONG for an evening celebrating GeoNight2021

*For one night, all participating organizations will get together to work on the same humanitarian project.*

Humanitarian crises such as natural disasters, disease outbreaks, epidemics or conflicts hit particularly hard when the ground situation is unknown.

Many of the world's most disaster-prone areas are not mapped and thus invisible on printed and digital maps. The student group HuMap Trier is dedicated to putting more people and invisible places on the map and raising awareness about them.
