

Trier (Trèves) is the oldest city in Germany and was given status of UNESCO world heritage. Visitors from all over the world visit the Roman monuments and other tourist sites in this city. Trier lies in the picturesque Mosel valley in the immediate vicinity of France, Belgium, and the financial center Luxembourg with its numerous EU institutions. Despite its age, Trier has remained young: The vibrant student population has a deep impact on the city.

Further information can be found at:
www.trier.de

Universität Trier was founded in 1473 and reopened in 1970 as a modern campus university. Since then, it has developed into a nationally and internationally renowned research and education institution. About 12,000 students are currently registered at Trier University. Its focus lies on economic, legal, and social studies as well as the liberal arts. The campus is situated in a parklike setting.
