

Soil Science Colloquium – Winter term 2024/2025

Tue, 16:15 to 17:45 (room F 59)

Date	Presenter	Topic
Nov-05	Khaoula Mennana	Methodological improvements in the extraction and detection of pharmaceuticals in poultry manure
Nov-12	Alena Förster	Perennial grain cultivation as a nature-based solution for resilient agriculture suggested by bioindicator species analysis
Nov-19	Sana Karimian	Effects of Selected Pharmaceuticals on Various Microbial Activities in Peat Soil
Nov-26	Daniel Lucas	Kohlen- und Stickstoffbilanzen im ökologischen Landbau (IBLA Luxemburg)
Dec-17	Anne Maybaum	Tracing the land-to-fjord micronutrient transport in southernmost Patagonia using Fe-isotopes (MSc concept)
	Julian Völker	Untersuchung der Adsorption und Desorption der Antibiotika Ciprofloxacin und Enrofloxacin an ausgewählten Torfböden
Jan-14		
Jan-21	Sven Ulrich	Soil chemical properties and nutrient dynamics in a peat soil under paludicultural management
	Mileidys Fernandez	Time and depth changes of ammonium and nitrate with differently fertilized soil under paludiculture
Jan-28	Eric Mirenga	A Closer Look: Metabolomic Analysis of Xenobiotics in Wastewater
Feb-04	Wallace Ongara	Sustainability of Paludicultures: Nutrient changes following fertilization of Paludiculture fenland in contrasting groundwater levels
	Denise Vonhoegen	Microbial-driven carbon dynamics in an agricultural soil
Feb-11	Ubaida Yousaf	Substrate effect on microbial carbon use efficiency and its potential consequences for soil carbon mass-balance
	Studenten Lehrforschungsprojekt	Ergebnispräsentation Befahrungsversuche
